4. BUDGETING PRINCIPLES

Expenses may only be incurred in terms of the approved annual budget (or adjustments budget) and within the limits of the amounts appropriated for each vote in the approved budget.

5.2 mSCOA Budget:

Comprises seven (7) segments that are to be complied with on transaction (posting) level. No further breakdown is required subsequent to transaction posting. All these seven segment are IDP driven.

5.2.1 Project Segment

- The project segment is linked to the IDP of the municipality. Due to the IDP being a 5- year plan, the need for a project segment was identified
- The accumulation of project-related transactions in a single posting-level account results in a classification not relating to "what is bought".
- The Project Segment distinguishes projects according to the nature of the expense whether it is capital or an operational expense.

5.2.2 Function Segment

- The Function Segment is the location within the SCOA for creating the "vote" structure standardised for all municipalities.
- This does not replicate the current vote structure, but indicate what function is being performed.

5.2.3 Item Segment

- The item segment relates to elements stemming from the Statement of Financial Performance and the Statement of Financial Position.
- For mSCOA purposes these comprise of 4 sub-categories Revenue, Expenditure; Gains and Losses and Assets, Liabilities and Net Assets.

5.3.4 Funding Segment

Review: 2020/2021 Financial Year

Next review: 2021/2020 Financial Year

- Indirect cost (secondary cost) is initially recorded as primary cost within the "Item" segment and funded according to the indicator selected in the "Fund" segment. The costing indicator within the "costing" Segment provides for the re-distribution of these primary costs between functions (no change in the funding source), together with indicators provided in the "Cost" segment. The "Project" segment provides the classification link to these indicators and specific projects.
- The purpose for including this segment in SCOA is to provide for the recording of full cost reflection for at least the four core municipal functions being electricity, water, waste water and waste management services, as a minimum requirement (for now).

5.2.7 Municipal Standard Classification

- Non Standardised segment. "Against which organisational vote or sub-vote should the transaction be recorded.

- Municipal revenue, operating and capital expenditure are then classified in terms of each of these votes. This means it is possible to present the operating surplus or deficit for each vote, along with information on the proposed capital budget. If a municipality delivers
